

AI PLAYBOOK FOR PUBLIC HEALTH

AI Playbook for Public Health: Tools and Checklists

Professional PDF version generated for website download from the source Word document.

Generative and Agentic AI

Implementation Playbook

for Public Health Departments

Tools and Checklists — Complete Edition (Tools 1–34)

A Comprehensive Guide for State, Territorial, Local, and Tribal Health Departments

Introduction

This document contains all 34 tools and checklists that accompany the AI Playbook for Public Health. Each tool is designed to support a specific play or phase in the Playbook, giving your team a practical, fillable instrument to use while working through the planning, prioritization, and implementation steps described there.

The Playbook describes what to do and why. This document gives you the structured forms, scoring frameworks, and checklists to do it. Neither document is meant to stand alone: use them together.

How This Document Is Organized

This toolkit contains 34 tools, organized in two groups:

Tools 1–11: The original toolkit tools, lightly revised to reflect updated play numbering and the new AI Playbook for Public Health branding.

Tools 12–34: New tools developed to fill gaps identified through a crosswalk analysis of the 12-Play framework. These tools cover plays and activities that the original 11 tools did not fully support.

All 34 tools are ordered in the sequence in which they are typically used across the 12 plays. The two crosswalk tables that follow the introduction provide a complete map: one showing each tool and the plays it supports, and one showing each play and the tools that support it.

How to Use These Tools

Read the play first. Understand what you are trying to accomplish, who needs to be involved, and what success looks like before opening any tool.

Use the crosswalk tables to confirm which tools are relevant for the play you are running.

Complete the tool during the play, not as a separate administrative task. The tools work best when completed in a workshop or meeting format with the right participants in the room.

Store completed tools in a shared project folder so the governance committee, future project staff, and auditors can access them.

Revisit and update. Several tools are living documents. The AI Readiness Self-Assessment should be updated annually. The Implementation Timeline should be refreshed every quarter. The Performance Monitoring Dashboard should be reviewed continuously.

Complete Crosswalk: Tools and Plays

This table maps every tool in this toolkit to the plays it supports. Use it to quickly identify which tools are relevant as you work through each play.

Complete Crosswalk: Plays and Supporting Tools

This table shows each play, its primary output, and all supporting toolkit tools. Use it during each play to confirm you have the right tools ready.

Play

Play Name

Primary Output

Supporting Tools

Play 1

Vision & Guardrails

AI vision and principles document

Tools: 1, 3, 12, 13

Play 2

Establish AI Governance

Governance committee, policy, and charter

Tools: 3, 13, 15, 22, 23, 24

Play 3

Engage Stakeholders

Stakeholder map and engagement plan

Tools: 11, 14, 15

Play 4

Readiness Assessment

Readiness scores and gap register

Tools: 1, 2, 9

Play 5

Workforce Development

AI workforce training plan

Tools: 5, 16, 17, 18

Play 6

Prioritize Use Cases

Governance-approved AI use case portfolio

Tools: 2, 3, 11, 19

Play 7

Design the Roadmap

Governance-approved AI roadmap

Tools: 2, 4, 9, 10

Play 8

Develop a Funding Strategy

Funding portfolio and grant alignment

Tools: 4, 8, 10

Play 9

Change Management

Adoption strategy and communications plan

Tools: 5, 20, 21

Play 10

Build and Deploy AI Solutions

AI pilot and production deployments

Tools: 2, 4, 7, 9, 10, 23, 24, 25, 26, 27, 28

Play 11

Monitor and Evaluate AI Systems

Performance and equity monitoring reports

Tools: 6, 29, 30, 31

Play 12

Execute Governance and Oversight

Audits, compliance records, governance docs

Tools: 6, 7, 31, 32, 33, 34

Tool 1

AI Readiness Self-Assessment

Supports: Play 1, Play 2, Play 3

Purpose

Help leadership and cross-functional teams understand their current capacity in governance, data, workforce, technology, equity, and partnerships before launching AI projects.

When to Use

Play 1: Establish Vision and Guardrails (to ground expectations)

Play 2: Readiness Assessment (core activity)

Play 3: Prioritize Use Cases (to identify feasibility constraints)

Update annually as AI program matures

Participants to Include

Leadership (health officer, deputy directors)

IT/technology staff

Data and analytics staff

Legal/privacy officers

Equity and community engagement staff

Program leads

Rating Scale: 0 = None, 1 = Some, 2 = Good, 3 = Excellent

1. Leadership and Governance

Indicator

Rating (0–3)

Leadership has articulated a vision for AI aligned with strategic priorities

Clear governance structure exists or is planned (committee, policies, decision authority)

AI ethics and equity principles have been established

Budget authority exists to support AI infrastructure and workforce

Domain Subtotal

/12

2. Data Infrastructure

Indicator

Rating (0–3)

Data systems are integrated or interoperable (surveillance, labs, EHR, registries)

Data quality is regularly monitored (completeness, timeliness, accuracy)

Cloud or modern analytics infrastructure is available for AI workloads

Data governance policies exist (access, privacy, security, use agreements)

Domain Subtotal

/12

3. Workforce Capacity

Indicator

Rating (0–3)

Staff with data science, analytics, or AI skills are available

Training programs exist to build AI literacy across the workforce

Job descriptions and career paths support data and AI roles

Partnerships with academic or technical organizations provide capacity

Domain Subtotal

/12

4. Equity and Community Engagement

Indicator

Rating (0–3)

Equity is explicitly considered in data collection and analysis

Community partners are engaged in priority-setting and design

Systems exist to monitor disparities in AI outputs and outcomes

Communication and transparency plans exist for AI use

Domain Subtotal

/12

5. Partnerships and Collaboration

Indicator

Rating (0–3)

Partnerships exist with academic, health system, or technology organizations

Data-sharing agreements are in place or feasible with key partners

Peer learning opportunities exist (consortia, CoPs, regional networks)

Vendor relationships are managed strategically with clear contracts

Domain Subtotal

/12

6. Privacy and Security

Indicator

Rating (0–3)

Privacy and security policies cover AI use cases

Systems are in place to monitor and respond to AI-related security risks

Legal counsel has reviewed AI plans for compliance with HIPAA, state law, and ethics

Incident response plans address AI-specific scenarios

Domain Subtotal

/12

TOTAL READINESS SCORE: _____ / 72

Interpreting Your Score

Score Range

Readiness Level

Recommended Action

60–72

Excellent Readiness

Launch pilots while strengthening governance and equity monitoring

45–59

Good Readiness

Close 3–5 high-priority gaps; start with small low-risk pilots

30–44

Moderate Readiness

Prioritize data infrastructure, governance, and workforce development; one very focused pilot

Below 30

Early Stage

Build data systems, hire key staff, establish governance, develop AI literacy; participate in peer learning networks

Gap Prioritization Worksheet

Tool 12

AI Vision & Principles Workshop Template

Supports: Play 1 — Vision & Guardrails

Purpose

Guide leadership and cross-functional teams through a structured workshop to develop the agency's AI vision statement and responsible AI principles. These outputs become the foundational governance documents that anchor all subsequent AI implementation work.

When to Use

Play 1: Vision & Guardrails — core activity for establishing strategic direction

Before any AI project is initiated or funded

When updating or revisiting the agency's AI strategic direction

Part 1: Shared Understanding (30 minutes)

Discussion Prompts:

What AI tools, if any, are staff currently using in their daily work?

What public health problems do we most want AI to help us solve?

What concerns do you have about AI that we should discuss openly?

Part 2: Vision Development (60 minutes)

As a team, draft an AI vision statement answering: What will AI make possible for our agency and the communities we serve?

Draft AI Vision Statement: _____

Part 3: Responsible AI Principles (60 minutes)

Principle Area

Definition

Our Agency's Commitment

Transparency

Stakeholders can understand when and how AI is being used

Privacy & Security

AI systems protect individual and community data

Equity & Fairness

AI reduces rather than widens health disparities

Accountability

Humans remain responsible for AI-informed decisions

Safety

AI systems are validated before deployment and monitored continuously

Community Trust

Affected communities are engaged in AI design and oversight

Legal Compliance

AI use complies with HIPAA, state law, and agency policy

Part 4: Guardrails and Boundaries (45 minutes)

Guardrail

Adopted?

Notes / Modifications

All AI outputs affecting public health decisions require human review before action

Yes / No / Modify

No AI system may process individually identifiable health data without a data use agreement and privacy review

Yes / No / Modify

All AI projects must complete an Equity Impact Assessment before deployment

Yes / No / Modify

AI system performance must be monitored continuously; systems producing harmful outputs will be paused

Yes / No / Modify

Community and public communication will disclose when AI has been used in public health decisions

Yes / No / Modify

No AI system will be deployed without documented validation against a defined performance standard

Yes / No / Modify

Part 5: Strategic Priorities (30 minutes)

Priority Area

Problem to Solve

Potential AI Application

Urgency (H/M/L)

Workshop Date: _____

Facilitated by: _____

Executive Sponsor: _____

Approval Date: _____

Tool 13

Responsible AI Policy Template

Supports: Play 1 — Vision & Guardrails | Play 9 — Establish AI Governance

Purpose

Provide a structured policy template that agencies can adapt to govern the development, procurement, deployment, and ongoing use of AI systems. This policy operationalizes the principles established in Play 1 and the governance structures created in Play 9.

Instructions

Complete all sections. Sections in brackets [] should be replaced with agency-specific content. Review with legal counsel, IT leadership, and the AI governance committee before adoption. Update annually or when major AI systems are added.

POLICY HEADER

Policy Title

Responsible Artificial Intelligence Use Policy

Policy Number

[Assign per agency numbering system]

Effective Date

Review Date

Annual review required

Policy Owner

[Title of responsible executive or office]

Approval Authority

[Health Officer / Board of Health / Tribal Council]

SECTION 1: PURPOSE AND SCOPE

[Agency Name] is committed to using artificial intelligence technologies in ways that improve public health outcomes, advance health equity, protect individual privacy, and maintain public trust.

This policy applies to:

All agency staff who develop, procure, configure, or use AI systems

All AI systems used in public health programs, surveillance, communications, and administration

All vendors, contractors, and partners who develop or operate AI systems on behalf of the agency

SECTION 2: RESPONSIBLE AI PRINCIPLES

3.1 Transparency

The agency will maintain documentation of all deployed AI systems and their intended uses

Staff and community members will be informed when AI is used in decisions that affect them

3.2 Privacy and Security

AI systems processing personally identifiable or protected health information must comply with HIPAA

Data use agreements must be established before any personal health data is used in AI training or operations

3.3 Equity and Fairness

All AI projects must complete an Equity Impact Assessment before deployment

AI system performance must be monitored across demographic subgroups

3.4 Accountability and Human Oversight

Human staff retain decision-making authority in all consequential public health decisions

AI outputs may inform but not replace professional judgment

3.5 Safety and Reliability

All AI systems must be validated against defined performance standards before deployment

AI systems producing erroneous or harmful outputs will be suspended pending investigation

SECTION 3: REQUIREMENTS BY IMPLEMENTATION STAGE

Before Initiating an AI Project:

Complete AI Project Charter (Tool 2)

Complete Equity Impact Assessment (Tool 3)

Obtain AI Governance Committee approval

Before Deploying an AI System:

Complete model validation per Model Validation and Documentation Standards (Tool 23)

Conduct security and privacy review

Confirm staff training completed

During Active AI System Operation:

Monitor performance metrics at defined intervals (minimum quarterly)

Follow Incident Response Checklist (Tool 7) for any AI-related safety or quality events

SECTION 4: ROLES AND RESPONSIBILITIES

Role

Responsibilities

Approved by (Name and Title): _____

Date: _____

Next Review Date: _____

Tool 14

Stakeholder Mapping & RACI Template

Supports: Play 2 — Engage Stakeholders

Purpose

Systematically identify all stakeholders who have an interest in or will be affected by the agency's AI implementation, define their roles and engagement needs, and assign clear accountability using a RACI framework (Responsible, Accountable, Consulted, Informed).

Part 1: Stakeholder Universe Map

Internal Stakeholders

Tool 15

AI Advisory Committee Charter Template

Supports: Play 2 — Engage Stakeholders | Play 9 — Establish AI Governance

Purpose

Establish the structure, authority, membership, and operating procedures for the agency's AI Advisory Committee. This charter formalizes the governance body responsible for guiding responsible AI implementation and providing accountability for AI activities.

SECTION 1: COMMITTEE PURPOSE AND AUTHORITY

1.1 Mission

The [Agency Name] AI Advisory Committee provides strategic oversight, guidance, and accountability for the agency's generative and agentic AI implementation program.

1.2 Authority

Approve or reject proposed AI projects

Suspend AI systems posing safety or compliance risks

Recommend AI policy updates to the approving authority

SECTION 2: MEMBERSHIP

AI Workforce Competency Framework

Supports: Play 4 — Workforce Development

Purpose

Define the AI knowledge, skills, and behaviors required across public health workforce roles. This framework guides training program design, supports AI champion identification, and helps staff understand what is expected of them at different levels of AI engagement.

AI Literacy Levels

Level

Who It Applies To

Core Requirement

Level 1: AI Aware

All agency staff

Understand what AI is, how it is being used in the agency, and their responsibilities as users

Level 2: AI Proficient

Program leads, data staff, analysts, epidemiologists

Use AI tools effectively and responsibly; evaluate AI outputs critically

Level 3: AI Practitioner

Data scientists, informaticists, IT staff, AI champions, project leads

Design, build, evaluate, and govern AI systems

Competency Domains

Domain 1: Foundational AI Knowledge

Competency

Level 1: Aware

Level 2: Proficient

Level 3: Practitioner

Understand AI types (ML, generative AI, agentic AI)

Basic definitions

Distinguish types and applications

Explain technical differences; identify use cases

Understand AI capabilities and limitations

Knows AI is not infallible

Evaluates AI outputs critically

Diagnoses model errors; documents limitations formally

Understand privacy law (HIPAA)

Knows PII must be protected

Follows data governance rules for AI

Ensures data governance compliance in AI design

Domain 2: Responsible AI Practice

Competency

Level 1: Aware

Level 2: Proficient

Level 3: Practitioner

Apply equity lens to AI

Understands AI can perpetuate bias

Recognizes biased outputs; raises concerns

Conducts equity impact assessments; monitors subgroup performance

Maintain human oversight

Knows human review is required

Reviews and validates AI outputs before acting

Designs human-in-the-loop workflows

Report AI concerns

Reports errors to supervisor

Documents and escalates concerns formally

Manages incident response; leads corrective action

AI Champion Designation & Role Guide

Supports: Play 4 — Workforce Development

Purpose

Define the AI Champion role, establish a process for identifying and designating champions across programs, and provide champions with a practical guide to their responsibilities.

Champions ARE

Champions are NOT

Peer resources who model responsible AI use

Technical support staff replacing the help desk

Early adopters who pilot new AI tools

Decision-makers who approve AI projects

Feedback conduits who surface concerns to leadership

Enforcers of AI policy

Communicators who translate AI concepts for colleagues

Spokespeople who minimize legitimate concerns

Champion Designation Process

Step 1: Selection Criteria

Selection Criterion

Why It Matters

Respected by peers and trusted by colleagues

Colleagues are more likely to ask questions and raise concerns with someone they trust

Curious and open-minded about new tools

Champions need to be willing to try, fail, and learn

Strong communicator

Champions must translate AI for non-technical colleagues

Demonstrates commitment to equity

Champions set the tone for responsible AI use

Has time and leadership support to take on this role

Champion responsibilities require protected time

Step 2: Nomination Form

Nominee Name: _____

Program / Division: _____

Nominated by (Supervisor Name and Title): _____

Nomination Date: _____

Nomination Justification:

AI Champion Responsibilities

Responsibility

Frequency

How

Model responsible AI use in daily work

Ongoing

Use AI tools per policy; document outputs; apply equity lens

Serve as first point of contact for peer questions

As needed

Office hours or direct availability

Facilitate AI literacy conversations in team meetings

Monthly

Share updates, ask questions, normalize learning

Surface concerns and feedback to AI leadership

Ongoing / meeting

Document issues; bring to champion cohort or AI coordinator

Pilot new AI tools and provide structured feedback

Per project

Use feedback forms; participate in user testing

Participate in champion cohort meetings

Monthly or quarterly

Attend facilitated peer learning sessions

Section 4: Barriers to Training

Barrier

Present? (Y/N)

Mitigation Strategy

Limited staff time for training

Low leadership buy-in for training investment

Limited training budget

Lack of public health-specific training content

Staff anxiety or resistance about AI

Geographic dispersal (remote or field staff)

Assessment completed by: _____

Reviewed by (AI Coordinator): _____

Tool 3

Equity Impact Assessment Checklist

Supports: Play 1, Play 3, Play 5, Play 9, Play 10

Purpose

Ensure AI projects reduce, rather than widen, disparities and are designed with and for affected communities.

When to Use

Play 1: Establish Vision and Guardrails

Play 3: Prioritize Use Cases

Play 5: Community engagement

Play 9: Before governance approval

Play 10: Before any pilot or scaled deployment

Participants to Include

Program leads

Equity and community engagement staff

Legal/privacy officers

Community representatives

Project Name: _____

Assessment Date: _____

Completed by: _____

Section 1: Communities and Representation

Which populations are most affected by the public health problem this AI project addresses?:

Are these populations adequately represented in the data?

Yes — well represented

Partially — some gaps exist

No — significant representation gaps exist

Unknown — need to conduct analysis

Have community partners or affected populations been engaged in project design?

Yes — ongoing engagement throughout project

Partially — consulted at key milestones

No — plan to engage before launch

Section 2: Data Equity

Are there groups missing or systematically under-represented in the training data?

No significant gaps

Yes — describe gaps: _____

Could historical bias in the data lead to biased AI outputs?

Low risk

Moderate risk — will monitor

High risk — mitigation required

Mitigation plan (if moderate or high risk): _____

Section 3: Outcome Equity

Could model errors disproportionately harm specific groups?

Low risk of differential harm

Moderate risk — monitoring plan in place

High risk — additional safeguards required

Describe differential harm scenarios and safeguards:

Section 4: Equity Monitoring

What equity metrics will be tracked over time?

Equity Metric

Subgroups to Monitor

Performance accuracy (sensitivity, specificity)

Race/ethnicity, geography, age, language

Resource allocation influenced by AI
Geography, income, insurance status
Time-to-action for AI-generated alerts
Urban vs. rural, language

Threshold triggers for review or corrective action: _____

Section 5: Assessment Summary

Overall equity risk level:

Low — proceed with standard monitoring

Moderate — proceed with enhanced equity monitoring and community engagement plan

High — redesign required before proceeding

Assessment completed by: _____

Date: _____

Reviewed by governance committee: _____

Tool 19

Use Case Scoring & Prioritization Matrix

Supports: Play 5 — Prioritize Use Cases

Purpose

Provide a structured, consistent method for evaluating and ranking candidate AI use cases. This tool helps leadership teams make evidence-based prioritization decisions, balancing expected public health value against feasibility, risk, and equity considerations.

Instructions

Step 1: Collect candidate use cases from program areas using the submission form below

Step 2: Score each use case across five dimensions using the scoring rubric

Step 3: Calculate weighted scores and rank use cases

Step 4: Review rankings with leadership and make final prioritization decisions

Part 1: Use Case Submission Form

Use Case Name: _____

Submitting Program / Division: _____

Submitter Name and Title: _____

Date Submitted: _____

Problem Statement:

Proposed AI Application:

Field

Response

Data sources needed

Data currently available?

Yes / Partially / No

Estimated number of people affected or benefiting

Primary user(s) of the AI system

Has a similar solution been implemented elsewhere?

Yes / No / Unknown

Known risks or concerns

Part 2: Scoring Rubric (Score each dimension 1–5)

Dimension (Weight)

Score 5

Score 3

Score 1

Public Health Impact (30%)

High-burden condition; measurable reduction in morbidity/mortality

Moderate benefit; improves efficiency

Unclear or minimal PH benefit

Feasibility (25%)

Data ready; staff ready; launch in <6 months

Moderate gaps; 12–18 month timeline

Not feasible with current resources

Equity & Community Benefit (20%)

Explicitly designed to reduce disparities; communities engaged

Neutral equity impact; standard monitoring

High equity risk; could widen disparities

Strategic Alignment (15%)

Directly supports top agency AI and strategic priorities

Moderate alignment

No clear alignment

Risk Level (10%)

Very low risk; reversible

Moderate risk; requires equity assessment

Very high risk; potential for serious harm

Part 3: Prioritization Scoring Summary

Use Case Name

Impact ×0.30

Feasibility ×0.25

Equity ×0.20

Alignment ×0.15

Risk ×0.10

Weighted Score

Rank

Weighted Score = (Impact × 0.30) + (Feasibility × 0.25) + (Equity × 0.20) + (Alignment × 0.15) + (Risk × 0.10)

Part 4: Prioritization Decision

Tier

Use Cases Selected

Rationale

Target Start

Tool 20

Staff Communication & FAQ Template

Supports: Play 6 — Change Management

Purpose

Provide a structured template for communicating AI projects to agency staff and partners. Clear, honest communication builds trust and reduces resistance.

Part 1: Project Announcement Template

[Customize for email, intranet, or staff meeting announcements]

Announcement Element

Draft Content

Subject line

[Agency Name] is piloting AI tools to support [Public Health Goal]

What this AI does

[Brief description of what the AI does and why]

What is changing for staff

[Specific change in workflow, tool access, or process]

What is NOT changing

Human staff remain responsible for all public health decisions

Privacy protections in place

[Describe data protections and HIPAA compliance]

Equity safeguards

[Describe equity safeguards]

How to ask questions

Contact [Name] at [email/phone] or attend Q&A session on [Date]

Part 2: Frequently Asked Questions

About the AI System

Question

Suggested Answer (Customize)

What exactly is this AI doing?

This AI system [brief description]. It analyzes [type of data] to help staff [specific task]. It does not make final decisions — those always remain with trained public health staff.

Will AI replace staff positions?

No. This AI system is designed to assist staff, not replace them. It handles [routine task] so that staff can focus on [higher-value activities].

Did staff have input into this decision?

Yes. We engaged [program leads / staff advisory group] during the design and planning process.

About Privacy and Data

Question

Suggested Answer (Customize)

Will this AI use personal health information?

[Yes / No / Limited.] [If yes:] The system uses [describe data]. We have a data use agreement in place and all data handling complies with HIPAA.

Who can see the data this AI processes?

Access is limited to [authorized staff roles] and follows our standard data governance policies.

About Errors and Safety

Question

Suggested Answer (Customize)

What if the AI gives me wrong information?

AI outputs should always be reviewed by a trained staff member before any action is taken. Report errors to [contact].

What if the AI produces something biased or harmful?

Report it immediately to [AI Champion name] or [AI coordinator]. We take all such reports seriously.

Tool 21

Resistance & Barrier Identification Tool

Supports: Play 6 — Change Management

Purpose

Systematically identify and address resistance and barriers to AI adoption before and during implementation. Proactively surfacing concerns reduces implementation failures and builds trust.

Section 1: Concern Inventory

Gather input through surveys, interviews, or team discussions. Document all concerns raised, even if leadership does not share them.

Concern Raised

Source (program/role — anonymized)

Concern Type

Frequency Raised (H/M/L)

Leadership Response

Concern Types: W = Workforce/job security P = Privacy/data E = Equity/fairness T = Technical/usability V = Value/purpose O = Organizational/resource

Section 2: Structured Barrier Assessment

Barrier Category

Present? (Y/N)

Severity (H/M/L)

Who Is Affected

Mitigation Strategy

Owner

Leadership: Lack of executive support

Y / N

Leadership: Competing organizational priorities

Y / N

Workforce: Fear of job replacement

Y / N

Workforce: Insufficient training or preparation

Y / N

Workforce: Digital literacy gaps

Y / N

Culture: Skepticism about AI accuracy

Y / N

Equity: Concern AI will harm vulnerable populations

Y / N

Technical: System usability problems

Y / N

Resource: Insufficient time for training or use

AI Governance Board Charter Template

Supports: Play 9 — Establish AI Governance

Purpose

Establish the formal decision-making governance board with binding authority over all AI initiatives. This charter creates a formal oversight body with authority to approve, suspend, and direct AI activities.

SECTION 1: BOARD IDENTITY AND AUTHORITY

1.1 Board Name

[Agency Name] AI Governance Board

1.2 Binding Authority

Approval or rejection of AI project proposals

Suspension or termination of deployed AI systems

Adoption, amendment, or repeal of AI governance policies

SECTION 2: MEMBERSHIP AND STRUCTURE

Position

Qualifications

Voting

Term

Board Chair

Senior agency leader; AI program accountability

Yes

2 years, renewable

Deputy Chair

Program director with AI implementation experience

Yes

2 years

Data and IT Representative

CIO or Director of Analytics/Informatics

Yes

2 years

Legal and Privacy Representative

Agency Counsel or Privacy Officer

Yes

2 years

Equity Representative

Chief Equity Officer or equivalent

Yes

2 years

Program Representative (2 seats)

Directors from AI-active programs (rotating)

Yes

1 year

External Expert (1–2 seats)

Academic, technical, or community expert in AI

Advisory

2 years

AI Program Manager

Staff lead for AI implementation

No (staff)

Ongoing

SECTION 3: GOVERNANCE RESPONSIBILITIES

Responsibility

Frequency

Output

Review and approve new AI project proposals

Each meeting (as submitted)

Approval record or rejection memo

Review AI system performance dashboards

Quarterly minimum

Performance review minutes

Conduct AI policy compliance review

Annual

Compliance report

Review and respond to AI incidents

Within 30 days of incident

Incident review record

Conduct equity and community impact review

Annual

Equity impact report

SECTION 4: CHARTER APPROVAL

Approved by (Health Officer or Board of Health): _____

Date Adopted: _____

Effective Date: _____

Next Annual Review Date: _____

Tool 23

Model Validation & Documentation Standards

Supports: Play 9 — Establish AI Governance | Play 10 — Build & Deploy AI Solutions

Purpose

Establish standards for validating AI model performance and documenting AI systems throughout their lifecycle. No AI system may be deployed without completing this process.

Part 1: AI System Documentation Card

Tool 24

Data Use Agreement (AI) Template

Supports: Play 9 — Establish AI Governance | Play 10 — Build & Deploy AI Solutions

Purpose

Establish a standardized template for data use agreements that address the specific requirements of AI system development and operation. This template must be reviewed by agency legal counsel before use.

Agreement Header

Field

Content

Agreement Title

Data Use Agreement for AI System Development and Operation

Agreement Number

Effective Date

Expiration / Review Date

Party A (Agency)

[Full legal name of public health agency]

Party B (Recipient / Vendor)

[Full legal name of receiving organization]

Applicable AI System(s)

[Name(s) of AI system(s) covered by this agreement]

SECTION 1: DATA DESCRIPTION

Data Set / Source

Data Type

Record Count (approx.)

Date Range

Includes PII / PHI?

Sensitive Data Categories (check all that apply):

Protected Health Information (HIPAA covered)

Personally Identifiable Information

Substance use disorder records (42 CFR Part 2)

Mental health records

Data from minors

Tribal or sovereign nation data

SECTION 2: PERMITTED USES

Party B may use the data ONLY for:

Development and training of the AI system identified above

Validation and testing of the AI system

Operation of the AI system for [described public health purpose]

Party B may NOT use the data for:

Training AI models for use by other clients or organizations

Commercial sale or licensing

Marketing or advertising

SECTION 3: AI-SPECIFIC PROVISIONS

3.1 Model Training Rights

Agency data may not be used to train AI models for purposes other than described in Section 2

Agency retains all rights to data; this agreement conveys no proprietary interest to Party B

3.2 Model Transparency

Party B must provide documentation of model architecture, training data sources, and known limitations upon request

Party B must notify Agency of material model changes no less than [30] days before implementation

3.3 Exit and Transition

Party B must not retain or use Agency data after agreement expiration or termination

Certificate of data destruction required within [30] days of expiration

SECTION 4: SIGNATURES

Agency Authorized Representative

Vendor / Recipient Authorized Representative

Tool 28

Pilot-to-Scale Decision Framework

Supports: Play 10 — Build & Deploy AI Solutions

Purpose

Provide a structured framework for making evidence-based go/no-go decisions about scaling AI systems from pilot to full deployment.

AI System / Pilot Name: _____

Pilot Period (Start – End Date): _____

Pilot Program Area: _____

Decision Review Date: _____

Section 1: Pilot Performance Summary

Metric

Pilot Target

Actual Result

Met? (Y/N)

Primary performance metric (e.g., accuracy)

Equity metric — performance gap across subgroups

Uptime / reliability

% of target users actively using system by end of pilot

User satisfaction score (1–5 scale)

Section 2: Readiness for Scale Assessment

Scaling Readiness Factor

Status

Notes / Evidence

Pilot performance met defined success thresholds

Yes / No / Conditional

Equity review confirms no disparate harm in pilot

Yes / No / Conditional

All pilot incidents resolved

Yes / No / Conditional

Model validation protocol complete for production

Yes / No / Conditional

Infrastructure can support full-scale load

Yes / No / Conditional

Training program ready for broader workforce

Yes / No / Conditional

Governance and monitoring plans ready for full deployment

Yes / No / Conditional

Funding confirmed for full-scale operation

Yes / No / Conditional

Section 3: Scaling Decision

Decision Option

Criteria

Selected?

Proceed to full deployment

All or nearly all success thresholds met; equity confirmed; infrastructure ready

Conditional scale-up

Most thresholds met; specific conditions identified; enhanced monitoring required

Extended pilot

Mixed results; additional pilot time needed; no major safety or equity concerns

Redesign before scaling

Significant performance or equity gaps identified; root cause analysis required

Discontinue

Pilot demonstrated AI solution is not effective, feasible, or safe for this use case

Decision rationale (required for all decisions):

Decision recommendation prepared by: _____

Date: _____

AI Governance Board decision: _____

Date of Board decision: _____

Tool 7

Incident Response Checklist

Supports: Play 10, Play 12

Purpose

Guide immediate response when an AI system produces erroneous or harmful outputs.

When to Use

Play 10: Build and Deploy AI Solutions — before deployment, establish the plan

Play 12: Execute Governance and Oversight — use when any AI incident occurs

When a deployed AI system produces erroneous, biased, or harmful outputs

Participants to Include

AI program manager

Technical lead

Program lead

Legal/privacy officer

Governance committee chair

Severity Classification

Severity Level

Description

Response Timeline

Critical

AI output causes or risks direct patient harm, legal violation, or significant public health harm

Immediate — within 1 hour

High

Significant error affecting multiple users or programs; potential equity violation; public exposure risk

Same day — within 4 hours

Medium

Errors affecting limited scope; no immediate harm; correctable with monitoring

Within 24 hours

Low

Minor errors or near-misses; limited scope; no harm

Within 72 hours

Summary Assessment

Overall system status:

☐ On track — all key metrics within acceptable range

☐ Monitor — one or more metrics approaching threshold; no action yet required

☐ Concern — one or more metrics below threshold; corrective action underway

☐ Critical — system paused pending investigation

Tool 29

Equity & Disparity Impact Monitoring Tool

Supports: Play 11 — Monitor & Evaluate AI Systems

Purpose

Provide a structured approach to monitoring AI systems for equity implications and disparate impacts on population subgroups over time. This tool tracks whether equity risks identified pre-deployment materialize after deployment.

AI System Name: _____

Reporting Period: _____

Report Prepared by: _____

Date: _____

Section 1: Performance Equity Dashboard

Tool 31

Continuous Improvement Log

Supports: Play 11 — Monitor & Evaluate | Play 12 — Execute Governance & Oversight

Purpose

Maintain a living record of lessons learned, improvement opportunities, and corrective actions across all AI systems. The Continuous Improvement Log ensures insights from monitoring, incidents, and user feedback are systematically captured and acted upon.

Instructions

Add entries whenever an improvement opportunity is identified. Review the log at each AI Governance Board meeting. Close entries when actions are completed and verified. Archive closed entries annually.

Tool 32

AI Governance Review Meeting Template

Supports: Play 12 — Execute Governance & Oversight

Purpose

Provide a standardized agenda and meeting template for regular AI Governance Board meetings. Consistent meeting structure ensures all governance responsibilities are addressed and decisions are recorded in a transparent, accountable way.
